9 infosec lessons

We discussed the current issues that are key in cybersecurity with Steven Woodhouse, a respected CIO with a wealth of cybersecurity experience. Here are 9 important lessons not to forget.

CLOUD

Read more

Cloud can be easy – which also makes it dangerous

Cloud brings new threats and risk transfers

Due diligence is still critical

TECHNICAL DEBT

Read more

Technical debt can bring an organisation down

Technical debt affects budget and risk

Technical debt relates to process too

SECURING SKILLS

Read more

Security has changed – so have the skills required

Keep your skills options open

Look in-house, and out of house too
